

Dobór roślin dla Wrocławia – drzewa ®

dr hab. prof. UW, UP Tomasz J. Nowak

Układ hierarchiczny. Nazwy łacińskie
Tomasz J. Nowak
Ogród Botaniczny Uniwersytetu Wrocławskiego

Materiały przeznaczone dla ogrodnika miasta Wrocławia,
architektów krajobrazu, projektantów i inspektorów nadzoru terenów zieleni

Konsultacja
Hanna Nowak
Zespół Doradczy ds. Zieleni Prezydenta miasta Wrocławia

Korekta
Hanna Nowak

Wersja robocza wr01 przed zatwierdzeniem przez Prezydenta Wrocławia

Kryteria doboru - siedlisko

Mrozoodporność

Odporność na suszę

Odporność na zasolenie

Odporność na zapalenie

Odporność na podmuchy wiatru

Tolerancja do gleby

Kryteria doboru – właściwości roślin

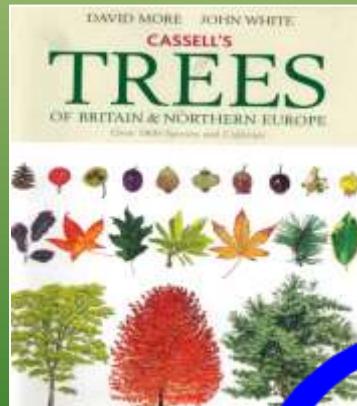

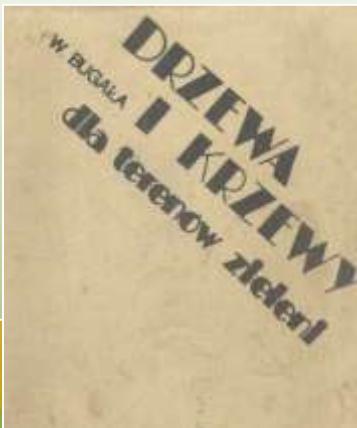

- pokrój
- toksyczność
- alergiczność
- brak cierni i kolców
- brak owoców jadalnych i atrakcyjnych dla ludzi i zwierząt
- duża odporność na patogeny i szkodniki
- odporność na jemiołę
- brak odrośli korzeniowych

Kryteria doboru - plastyczność

- barwa
- zmienność w czasie
- struktura wewnętrzna

Podstawa doboru

Literatura

Obserwacje własne

OZNACZENIA:

Cechy drzew:

odporność na silne wiatry

odporność na zasolenie

mrozodporność

4a: do -31.7°C – -34.4°C

4b: do -23.4°C – -31.6°C

5a: do -26.1°C – -28.9°C

5b: do -23.4°C – -26.0°C

6a: do -20.6°C – -23.3°C

6b: do -17.8°C – -20.5°C

7a: do -15.0°C – -17.7°C

Zastosowania:

parki, zieleńce, zieleń międzyblokowa

aleje, promenady

zadrzewienia przyuliczne

Wysokość rośliny po około 30 latach uprawy

ok. 5

ok. 10m

ok. 20m

= ok. 35m

Średnica korony po około 30 latach uprawy

do 5m

do 10m

do 20 m

= ok. 35 m

Oznaczenia drzew:

PIK – najcenniejsze

KIER – bardzo wartościowe

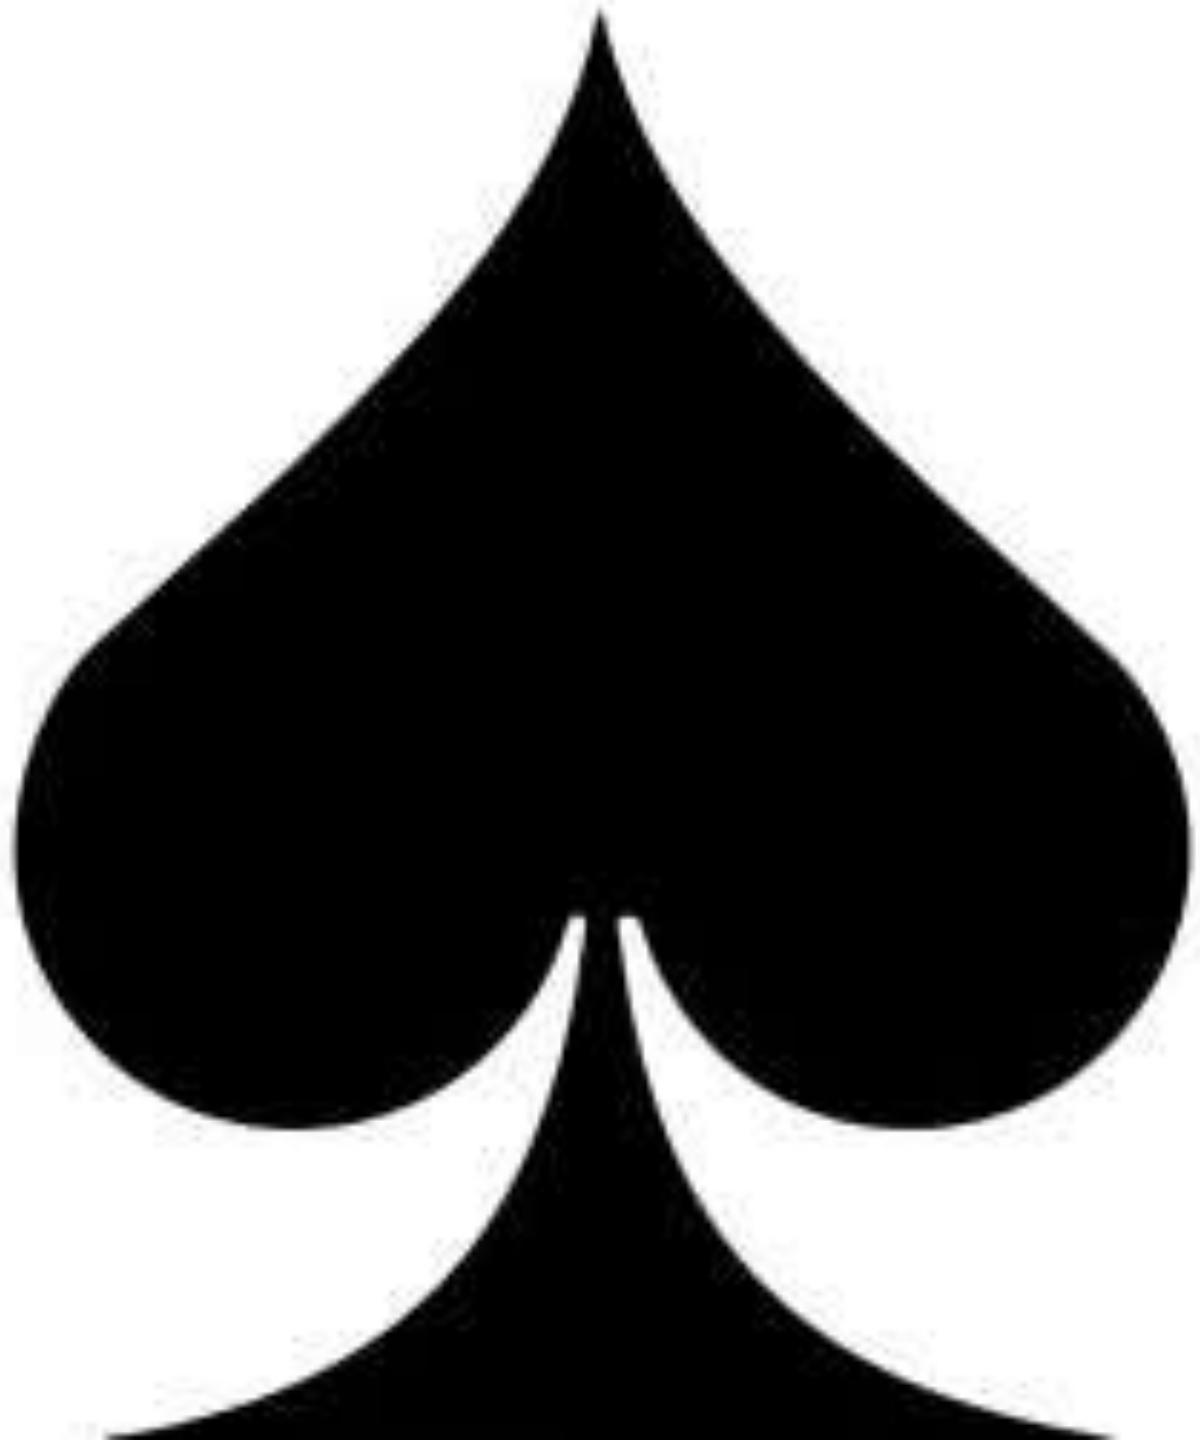

KARO – wartościowe

TREFL – dobre

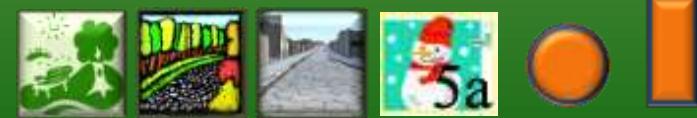

Gingko biloba 'Fastigiata' - typ Wrocław

Gingko biloba 'Fairmount'

Gingko biloba 'Princeton Sentry'
